the 1990s, the number of people in the world who are under 15 years of age is expected to increase by 1.5 billion (United Nations 1994). This increase is expected to be particularly marked in the developing countries.

There is a growing awareness of the need to take account of the needs of children in the development of health care systems. The World Health Organization (WHO) has developed a strategy for child health care (WHO 1990) which emphasizes the need for a holistic approach to child health care, taking account of the physical, mental, social and emotional needs of children. The WHO strategy also emphasizes the need for a community-based approach to child health care, involving parents and other members of the community in the provision of health care.

The WHO strategy has been adopted by many countries, and has led to a number of initiatives to improve child health care. In the United Kingdom, the Department of Health has developed a strategy for child health care (Department of Health 1994) which is based on the WHO strategy. The Department of Health strategy emphasizes the need for a holistic approach to child health care, taking account of the physical, mental, social and emotional needs of children. The Department of Health strategy also emphasizes the need for a community-based approach to child health care, involving parents and other members of the community in the provision of health care.

The Department of Health strategy has led to a number of initiatives to improve child health care. In the United Kingdom, the Department of Health has developed a number of initiatives to improve child health care, including the development of a national child health strategy, the development of a national child health curriculum, and the development of a national child health research programme. The Department of Health has also developed a number of initiatives to improve child health care in the community, including the development of a national child health network, the development of a national child health information system, and the development of a national child health training programme.
